

Empathy Map Canvas – ServiceNow Incident Agent

Implement Client Script & UI Policy (Incident) for NM Project
Date: 03 October 2026 | Team ID: NM-TEAM-ID

User Persona

Primary user: Service Desk / Incident Agent. Goal: record, update, and resolve incidents quickly while maintaining complete and accurate information.

Says

"I need the form to tell me what information is required."

"I should not accidentally change fields that are only relevant in another state."

"I want immediate validation before I submit."

Thinks

Which fields are mandatory for this state?

Can I submit this incident safely?

What information is needed before resolving or putting the incident on hold?

Does

Creates incidents

Changes state, impact, urgency and priority

Adds work notes and resolution information

Submits and updates incidents

Feels

Frustrated by unnecessary fields

Concerned about incomplete records

More confident when the form gives clear guidance

Pains

Missing mandatory data

Incorrect state transitions

Unclear field behavior

Repeated manual correction

Gains

Consistent incident records

Fewer invalid submissions

Clearer form experience

Faster incident processing
